

## ELECTRICAL DUCT BEND

### WE FABRICATE BENDS TO SUIT ANY RADIUS REQUIREMENT

NO MATTER HOW TIGHT OR WIDE YOUR SPEC IS. OUR LARGEST BEND FABRICATED SO FAR IS AN IMPRESSIVE **10-METRE RADIUS**, PERFECT FOR LARGE-SCALE INFRASTRUCTURE PROJECTS.

  
**MADE  
IN NEW  
ZEALAND**

#### KEY FEATURES

- **Precision-fabricated** using durable, high-quality PVC
- **Smooth internal finish** for easy cable pulling
- **UV-stabilised** for outdoor and underground installations
- **Heat- and corrosion-resistant** for harsh environments
- **Compatible** with standard conduit and fittings
- **Available in a range of diameters**
- Compliant with **AS/NZS 1260 standard**
- Classification: **Light Duty to Heavy Duty**

#### IDEAL APPLICATIONS

- **Commercial and industrial** electrical installations
- **Civil infrastructure and utility projects**
- **Renewable energy** farms (solar/wind)
- **Rail and transport** corridor cabling
- **Data centres** and substations

#### WHY CHOOSE THE ELECTRICAL BEND?

- **Custom-made** to your project specs.
- **Save time** on-site with prefabricated bends.
- **Reduce installation** labour and material waste.
- **Consistent, professional** finish.
- **Fast turnaround** and **local fabrication**.

*Made in New Zealand for high-performance infrastructure.*

*Angled socket joint between bends for a precise fit.*

*Large-radius bend (2m), the perfect balance of flexibility and control.*
